DATA CENTRIC PROTECTION FOR EXPORT CONTROL COMPLIANCE ▶▶

PROTECT AND CONTROL SENSITIVE ITAR AND EAR DATA

Protecting critical business data is a continual challenge for global aerospace and defense organizations.

For those organizations in the defense and aerospace industries, it is paramount to ensure that sensitive data is protected and controlled in order to adhere to strict Export Control requirements such as ITAR and EAR. Sensitive information can include documents, manuals, design drawings and any other information that falls under these Export Control regulations. Organizations failing to comply with these regulations can be faced with severe fines, loss of reputation and even criminal charges.

The Boldon James Classifier data classification solution supports ITAR compliance by enabling organizations to force users to identify sensitive data and make decisions about how it is stored and transmitted, which may help build a set of 'reasonable measure' controls to maintain compliance with ITAR regulations.

The largest ITAR fine was $400m in 2010

Average cost of a data breach in 2013 was $3.5m[†]

After a data breach 25% of organizations report a decline in company share price[†]

## DRIVING EXPORT CONTROL COMPLIANCE WITH BOLDON JAMES CLASSIFIER:

▶▶ Makes users aware of the duty of care in relation to Export Control

▶▶ Provides users with the ability to label documents for Export Control

▶▶ Allows checks on the clearance level of users and on document release to external organizations

▶▶ Meets regulatory requirements around Export Control

▶▶ Prevents common Export Control violations

▶▶ Empowers users to identify sensitive Export Control data

▶▶ Utilizes metadata to direct other technologies such as email gateways, encryption and rights management

CLASSIFIER – THE FIRST STEP TO SECURING YOUR DATA

The CLASSIFIER SUITE is a flexible data classification product set, offering a range of optional elements to help protect all your sensitive data. Using our unified administration console you can see and manage all your data classification activities. Classifier is easy to set up and integrate with your existing security and data management solutions such as DLP, encryption and rights management.

BOLDON JAMES – YOUR PARTNER IN SECURITY

Boldon James has been providing secure information exchange solutions to the defense and aerospace industry for 30 years. With a proven track record of delivering successful projects to meet a wide range of customer needs, Boldon James is well placed to help organizations meet Export Control compliance requirements such as ITAR. Many global defense and aerospace organizations rely on Boldon James to protect their sensitive data and their brand reputation. These include the US Department of Defense, BAE Systems, QinetiQ and EADS.
