HANDD
BUSINESS SOLUTIONS

8 IN 10 BUSINESSES

aren't ready for the Digital Operational Resilience Act (DORA)

HANDD conducted a survey of cybersecurity professionals in the UK. 80% aren't working towards a plan to conform with DORA regulations.

Our DORA guide outlines how the new regulations could impact your organisation and what you need to do to achieve compliance.

GET OUR FREE DORA GUIDE HERE

80% of cybersecurity professionals aren't working towards a plan to conform with DORA regulations

Only 22% of organisations are confident they understand the changes required

48% don't know whether their organisation has identified the required changes that will be required under DORA

35% haven't considered which tools to use for reporting breaches under DORA

57% don't know if their organisation is already performing Threat Lead Penetration Testing

6 in 10 don't know whether their organisation has an Incident Classification Framework in place

New DORA regulation focuses on third-party risk assessment

Three main challenges were identified from our survey:

1 Identifying risk profiles

2 Mitigating risk profiles

3 Correctly identifying third-party suppliers

Survey conducted by HANDD Business Solutions Ltd, Dec 2023
